November 1, 2018

Dear Webutuck Community and Webutuck Staff,

Over the last two months, we have had to dismiss students early due to water issues within the District.

I wanted to take the time to inform you on the issues that led to these early dismissals.

Our first early dismissal on October 12 was due to a water main break that feeds both locations of WES and EBIS/WHS. This main break occurred at the well site at WES which feeds both facilities.

Today's early dismissal was caused by a fault in the pumping system located at the EBIS/WHS facility which is intended to pump the water from the holding tank into the facility.

Our Capital Improvement Project that we are currently in the midst of calls for replacement of the pumps and system at EBIS/WHS. Unfortunately, we await approval from the Department of Health on the planned project, until then, we are "bandaiding" the system.

Thank you for your understanding and I will keep you informed and updated as I am informed of them.

Sincerely,

Raymond Castellani  
Superintendent
