September 18, 2018

Dear Webutuck Families,

As promised, I am providing you with an update on the mold inspection and air testing being conducted in our District. As of this afternoon, the inspection, testing and monitoring by an independent industrial hygienist have been conducted at the Webutuck Elementary School. Samples have been sent for testing to a lab. A report will be provided to the District no later than tomorrow morning. Tomorrow, Wednesday, September 19th inspection, monitoring and sampling will occur at the high school, intermediate school, and bus garage. A report on those facilities will be provided to us the following day.

This process of assessment is the first step outlined by the guidelines of New York State. Once the assessment is complete over the next two days, we will then be provided with documentation which will provide any identified areas of concern, a standard of care and a plan for remediation.

Over the next two days, I will continue to update you on this process. As always, our students' and staff's safety is at the forefront of all of our decisions and we thank you for your understanding of this matter.

Sincerely,

Raymond Castellani
Superintendent of Schools
